

Abstract

Cervical intervertebral prosthesis with at least one cover plate (3, 4) to be connected to one of the two adjacent vertebral bodies (1, 2), and with a securing plate (12) which secures this cover plate (3, 4) and is to be fastened to the ventral surface of the vertebral body (1, 2). According to the invention, the securing plate (12) is a separate part unconnected to the cover plate (3, 4). It can be biodegradable.
